FORMING BLANKS

Available as 120mm Diameter Round Blanks or 125mm Diameter Round Blanks or 125mm x 125mm Square Blanks

All our forming blanks apart from Erkocryl are ‘Wide Belt Extruded’ so as to ensure they have no stresses within them and they are a uniform thickness. They are made from virgin granules and do not contain any recycled material to ensure that they can be manufactured to be of surgical grade.

ERKOFLEX GLASS CLEAR MOUTHGUARD BLANKS

High impact absorbing - extruded - suitable for pressure lamination technique - surgical grade

ERKOLOC-pro HARD/SOFT PRE-LAMINATED BLANKS FOR CLENCHING INHIBITORS

Erkoloc-Pro is not available as 125mm Round or 125 x 125mm Square as conventional vaccum forming machines do not have sufficient power to suck them down and the heaters on 125mm machines face the fitting surface (soft) rather than the non-fitting surface (hard).

ERKODUR HIGH IMPACT IMPLANT SPLINT/STENTS/RETAINERS/ESSEX RETAINERS

complete with very thin spacer-does not bubble-no pre-heating required-combines with acrylic (Does bond with acrylic or light cured materials – treat with degreasing/laminating agent and then after 5 minutes with monomer. For best bond do not remove from model for 3 hours). (4.00 and 5.00mm may need to be pre-dried).
